Proprietary Certificate

To whom it may concern;

We hereby declare that the below listed products are a registered trademark of Becton, Dickinson and Company. All trademarks mentioned below are proprietary items under international intellectual property rights.

Sr. No.	Catalogue	Description	Intended Use
1	491451	BD SurePath™ Direct to Slide Kit	The BD SurePath™ Direct to Slide Kit method produces a Liquid Based Cytology (LBC) slide appropriate for use in the morphological evaluation of cervical samples.
2	491332	BD Density Reagent	The BD PrepStain™ System (formerly the AutoCyte® PREP System) is a liquid-based thin layer cell preparation process. The BD PrepStain System produces BD SurePath™ Liquid-based Pap Test slides that are intended as replacements for conventional gynecologic Pap smears. BD SurePath Liquid-based Pap Test slides (formerly AutoCyte PREP slides) are intended for use in the screening and detection of cervical cancer, pre-cancerous lesions, atypical cells and all other cytologic categories as defined by The Bethesda System for Reporting Cervical/Vaginal Cytologic Diagnoses. BD SurePath Preservative Fluid is an appropriate collection and transportation medium for gynecologic specimens tested with BD ProbeTec™ Chlamydia trachomatis (CT) Qx and Neisseria gonorrhoeae (GC) Qx Amplified DNA Assays.
3	491458	BD Cytology Stain Kit	The BD Cytology Stain is a reagent (multicolored stain) used for the purpose of staining (coloring) cells collected from the human body to be examined for diagnostic purposes.
4	491452	BD SurePath™ Collection Vial Kit 500	BD SurePath™ Collection Vial Kit 500 is designed for use with BD PrepStain and BD Totalys Systems for the processing of BD SurePath liquid-based Pap tests.
5	491457	BD Alcohol Blend Rinse	The BD Cytology Stain and BD Non-GYN stain kits are reagents (multicolored stains) used for the purpose of staining (coloring) cells collected from the human body to be examined for diagnostic purposes.

Becton, Dickinson and Company, as on date, exclusively manufactures the above-mentioned products. We confirm that Becton Dickinson India Private Limited (BD India) is our 100% subsidiary in India and is authorized to market this product as a proprietary item and provide necessary services in terms of product knowledge and training.

This document is valid up to 2 years.

SUPPLY ORDER

To
M/s. Subra Scientific Company,
No. 54, Balathandayudham Street,
Ellaipillaichavady,
Puducherry- 605 005.

Dear Sirs,

Sub: Procurement of Consumables for "Automated Thin Preparation Cyto Analyzer"
[Make: Becton Dickinson (BD)] (Model No. TRIPATH) (Sl.No. 4373) – Reg.
Ref: Your Quotation No. QU/SSC/PDY/23-24/277; Dated: 08-05-2023.

With reference to the above, you are requested to supply the items listed overleaf on the following terms and conditions:

The supply should be effected within 30 days from the date of issue of order.

1. Please confirm by return of post as to whether the supply can be made by the above date. If no reply is received or if the articles are not supplied within 30 days from the date of this order, the order shall automatically stand cancelled and this Institute will take necessary steps to procure the items ordered to you from the next lowest firm and you have to pay the RISK purchase involved, for the difference of amount. If you are not in a position to pay the Risk Purchase amount, your EMD paid along with the Tender will be forfeited and your Tender will be disqualified for all the items quoted by you as per rules applicable.
2. No supply, which is not according to the specifications and not meeting our requirement, will be accepted.
3. Please note that your rates are F.O.R., Pondicherry.
4. Door delivery to be made directly to the dept. of **PATHOLOGY** with a packing slip mentioning this order number
5. PLEASE SUPERSCRIBE ON THE CASE/PARCEL THE DEPARTMENT NAME FOR WHICH THE ORDER IS PLACED ALONGWITH THE REFERENCE OF THIS PURCHASE ORDER NO. SO THAT THE CONSIGNMENT REACHES THE CONCERNED DEPARTMENT.
6. The articles should be properly packed before despatch to avoid damage or breakage during transit. Damages, breakage, if any found on opening the case will be reported to you immediately and the same should be made good by you at your cost. No insurance charges are payable.
7. Please prepare the bill in triplicate in the name of the Director, JIPMER and send it along with a copy of this order and an advance stamped receipt directly to the Director's Office (Accounts Section), JIPMER, Pondicherry-6. Payment will be made to you by ECS.

8. This being a Central Government Institution, existing rules do not permit to make any advance payment or payment against document through Bank.
9. Security Deposit of ₹NIL/- (R/O) (i.e. 3% value of the order) has to be paid through SBI Collect Link (www.jipmer.edu.in ---> online payments ----> Security Deposit) before effecting their supply of the item payment, confirmation / e-receipt duly rubber stamped, self-attested to be submitted to this office as agreed to and signed by you. No other mode of payment will be accepted.
10. The firm is requested to furnish the Name of the Account Holder, Bank Account No., Name of the Bank, Name of the Branch, IFS code No., and PAN No. in the invoice furnished against this Supply Order. Without this, the bill will not be admitted by the department.

Please acknowledge the receipt of this supply order by return of post.

Yours faithfully,

BD SurePath™ Direct to Slide Processing Guide

Simplicity for LBC

BD SurePath™ Direct to Slide Kit Specimen Processing Procedure

- A blue brush head is being rinsed into a white BD SurePath™ Collection Vial. A red 'X' is drawn over the brush head, indicating it should not be used for collection.

1 After the sample is collected using a Rovers® Cervex-Brush® or equivalent sampling device, rinse the brush head directly into the fluid, remove from the handle and drop into the larger opening of a BD SurePath™ Collection Vial. Tightly cap the vial, label, send to the laboratory, and accession.
- A white BD Settling Chamber is being attached to a white BD SurePath™ Direct to Slide Kit Slide Holder.

2 Place the labeled BD PreCoat™ Slide(s) into the BD SurePath™ Direct to Slide Kit Slide Holder. Attach a BD Settling Chamber.
- A blue pipette is adding a yellow liquid (BD Density Reagent) into the white BD Settling Chamber.

3 Pipet 1 mL of BD Density Reagent into the BD Settling Chamber.
- A hand is holding a blue BD SurePath Collection Vial and vortexing it.

4 Vortex the BD SurePath Collection Vial for 15 seconds.
Note: Sufficient volume is available in the BD SurePath Collection Vial to allow removal of up to 0.5 mL of homogenous mixture of cells and fluid for ancillary testing, while still allowing sufficient volume for Pap testing. The aliquoting may be performed after this vortexing step in the BD SurePath Direct to Slide process.
- A blue pipette is adding a yellow liquid (sample) into the white BD Settling Chamber.

5 Slowly pipet 2 mL of sample into the BD Settling Chamber.
Note: Hold the tip of the pipet onto the edge of the BD Settling Chamber. Be careful not to disrupt the BD Density Reagent surface.
- A white BD SurePath Direct to Slide Kit Slide Holder with sample is being placed into a compatible centrifuge.

6 Place the BD SurePath Direct to Slide Kit Slide Holder with sample into a compatible centrifuge and spin at 200 g for 2 minutes.
- A blue pipette is adding a clear liquid (BD Alcohol Blend Rinse) into the white BD Settling Chamber.

7 Remove the BD SurePath Direct to Slide Kit Slide Holder from the centrifuge. Decant, and wash the sample by pipetting 1 mL of BD Alcohol Blend Rinse or equivalent.
Note: Hold the tip of the pipet onto the edge of the BD Settling Chamber. Be careful not to dislodge the cells from the surface of the slide.
Decant by inversion. Repeat X 1.
- A hand is holding a white BD SurePath Direct to Slide Kit Slide Holder and inverting it.

8 Invert the BD SurePath Direct to Slide Kit Slide Holder for 1 minute. Remove the BD Settling Chamber. Place the slide(s) in a BD Alcohol Blend Rinse or equivalent.

Suggested Staining Procedure

Each step below requires the slide be moved to the appropriate reagent outlined for the timing/dips indicated.

Step	Reagent	Timing/Dips
1	Deionized Water	10-20 dips
2	Deionized Water	10-20 dips
3	BD Hematoxylin 0.75	85 seconds
4	Deionized Water	10-20 dips
5	BD Alcohol Blend Rinse (or equivalent)	10-20 dips
6	BD Alcohol Blend Rinse (or equivalent)	10-20 dips
7	BD EA/OG Combo	75 seconds
8	BD Alcohol Blend Rinse (or equivalent)	10-20 dips
9	BD Alcohol Blend Rinse (or equivalent)	10-20 dips
10	Xylene (or equivalent)	10-20 dips
11	Xylene (or equivalent)	10-20 dips
12	Xylene (or equivalent)	10-20 dips

NOTE: Slides should remain in xylene until ready for coverslipping. Prior removal may result in air drying of slides.

NOTE: Always ensure slides are promptly moved to xylene (or equivalent) at the end of the staining procedure. Leaving slides in BD Alcohol Blend Rinse (or equivalent) may result in progressive de-staining of slides.

NOTE: Slides should be coverslipped one at a time or via an automated coverslipper for optimal results.
